ECPD 2025 venue: [DUO congress center](http://www.duocongresscenter.cz), Prague 8 - Střížkov, Czechia,
April 7th - 10th 2025

The **European Conference on Plasma Diagnostics (ECPD)** is an event taking place every two years aiming at bringing together scientists and engineers working on plasma diagnostics for magnetic confinement fusion, inertial fusion, beam plasmas, low-temperature and industrial plasmas as well as basic and astrophysical plasmas. The sixth edition of the conference is the continuation of a very successful series that started in 2015 in Frascati (Italy) and became an important forum for cross-field discussions on plasma diagnostics.

The 2025 edition will be held in **Prague, Czechia (April 7th - 10th 2025)** and organized by the [Institute of Plasma Physics of the Czech Academy of Sciences](http://www.ipp.cas.cz). The conference is expected to attract between 100 and 200 participants.

Experimentalists from all plasma physics areas will join and discuss cutting edge diagnostics in their field. The ECPD thus offers manufacturers and suppliers of various instrumentation, such as lasers, cameras, spectroscopy, optics etc., an interesting opportunity for a targeted presentation of new products. It also allows publishers to reach out and invite potential authors to submit their works to relevant journals.

On behalf of the ECPD 2025 Local Organizing Committee, we would like to invite representatives of scientific equipment manufacturers and representatives of journal publishers to participate in sponsoring the upcoming event. We offer two options for conference sponsors (see next page).
